

Ford Triplog Installation Guide

Requirements

- Home Assistant (latest version recommended)
- FordPass integration by marq24 installed and configured
- A working FordPass account connected to Home Assistant

Ford Triplog uses data provided by the FordPass integration and will not work without it.

Manual Installation

1. Download the latest release from GitHub.
2. Extract the ZIP file.
3. Copy **custom_components/ford_triplog** into **config/custom_components/**.
4. Restart Home Assistant.

Add the Integration

1. Open Settings → Devices & Services.
2. Click Add Integration.
3. Search for Ford Triplog.
4. Complete the setup wizard.

Configuration

Select your FordPass device, odometer sensor, SOC sensor and ignition sensor.

Features

- Automatic trip detection
- Smart Trip mode
- Reverse geocoding
- Trip history
- Trip statistics
- Dashboard support

Planned Features

- Charging history
- Charging statistics
- AC/DC charging detection
- Smart Trip with charging stops
- Optional charging cost tracking
